PLAN/2023/1013 ANNEX
(POOL/E2/2023/1013/1013-EN
ANNEX.docx) D097818/01
[...](2024) **XXX** draft

ANNEXES 1 to 3

ANNEXES

to the

COMMISSION REGULATION (EU) .../...

on the use of bisphenol A (BPA) and other bisphenols and their derivatives with harmonised classification for specific hazardous properties in certain materials and articles intended to come into contact with food, amending Regulation (EU) No 10/2011 and repealing Regulation (EU) 2018/213

ANNEX I

The chemical structure of substances for which the definition 'bisphenol' and 'bisphenol derivative' applies is as follows:

(A) Bisphenol structure

(B) Bisphenol derivative structure

Notes. X refers to any bridging group separating the two phenyl rings by one single atom, but the atom can have any substituent(s).

R_1 to R_{10} refers to any substituent. At least one of the substituents is not a hydrogen atom (H).

ANNEX II

Union list of BPA and other hazardous bisphenols and hazardous bisphenol derivatives authorised for use in the manufacture of food contact materials and articles for specific applications

Column 1 (FCM No): the Food Contact Materials (FCM) substance number

Column 2 (CAS No): the Chemical Abstracts Service (CAS) registry number

Column 3 (Substance name): the IUPAC chemical name

Column 4 (Material type): the group of materials and articles which may be covered by specific measures

Column 5 (Specific application): the specific application for which the use of the substance is restricted and for which the derogation applies

Column 6 (Other restrictions): other restrictions that apply

(1)	(2)	(3)	(4)	(5)	(6)
FCM substance No	CAS No	Substance name	Material type	Specific application	Other restrictions
151	80-05-7	4,4'-isopropylidene diphenol (bisphenol A)	Varnishes and coatings	For use as a monomer or starting substance in the manufacture of liquid epoxy resins to be applied on self-supporting materials or articles with a capacity greater than 1000 litres	Migration into food shall not be detectable. Final food contact articles shall be cleaned and flushed prior to first being brought into contact with food
			Plastics	For use as a monomer or starting substance in the manufacture of polysulfone filtration membrane assemblies	Migration into food shall not be detectable. Final food contact articles shall be cleaned and flushed prior to first being brought into contact with food

ANNEX III

The declaration of compliance referred to in Article 8 shall contain the following information:

- (1) the identity and address as well as contact details including either a current telephone number or email address of the business operator issuing the declaration of compliance;
- (2) the identity and address as well as contact details including either a current telephone number or email address of the business operator which manufactures or imports the material or article;
- (3) the identity of the food contact materials or articles, including both intermediate food contact materials and final food contact articles;
- (4) the date of the declaration;
- (5) a list of any bisphenols or bisphenol derivatives used in the manufacture of the food contact material or article;
- (6) a statement that the intermediate food contact material or article or final food contact article complies with this Regulation and the requirements set out in Articles 3, 15 and 17 of Regulation (EC) No 1935/2004.
